International Journal of Fracture

CONTENTS OF VOLUME 102 (2000)

Vol. 102, No. 1, 2000

Size effects in concrete fracture: Part I, experimental setup and observations	MOHSEN A. ISSA, MAHMOUD A. ISSA, MOHAMMAD S. ISLAM and ALEXANDER CHUDNOVSKY	1–24
Size effects in concrete fracture – Part II: Analysis of test results	MOHSEN A. ISSA, MAHMOUD A. ISSA, MOHAMMAD S. ISLAM and ALEXANDER CHUDNOVSKY	25–42
Constraint effects on the ductile-to-brittle transition temperature of ferritic steels: a Weibull stress model	X. GAO and R.H. DODDS, JR.	43–69
Fracture in angle-ply ceramic matrix composites	A.S. SELVARATHINAM and Y.J. WEITSMAN	71–84
LEFM size requirements for the fracture testing of sea ice	S.V. MULMULE and J.P. DEMPSEY	85–98

Vol. 102, No. 2, 2000

Superposition method for calculating singular stress fields at kinks, branches and tips in multiple crack arrays	J. KENNETH BURTON JR. and S. LEIGH PHOENIX	99–139
Study on the behavior of elastic-plastic fracture under mixed I+II mode loading in aluminum alloy Ly12-J-integral analysis	SHA JIANGBO, SUN JUN, ZHU PIN, DENG ZENGJIE and ZHOU HUIJIU	141–154
Dynamic ductile crack growth and transition to cleavage – a cell model approach	LIN XIA and LI CHENG	155–175
Complex hypersingular integral equation for the piece-wise homogeneous half-plane with cracks	S.G. MOGILEVSKAYA	177–204

Vol. 102, No. 3, 2000

T-effect for the interaction problem of an interface macrocrack with a near-tip microvoid	HAN JIAN-JUN and CHEN YI-HENG	205–222
Interface crack interacting with a microvoid in the near-tip process zone	HAN JIAN-JUN and CHEN YI-HENG	223–245
Mode III two-dimensional crack problem by two-level finite element method	A.Y.T. LEUNG and K.L. TSANG	247–260
Correction methods of an apparent negative crack growth phenomenon	CHANG-SUNG SEOK	261–271
Representation of crack-tip plasticity in pressure sensitive geomaterials	PANOS PAPANASTASIOU and COLIN ATKINSON	273–288
Dislocation emission criterion for a wedge crack under mixed mode loading	BI-TRONG CHEN and SANDBOH LEE	289–304

Vol. 102, No. 4, 2000

Interaction between an interface crack and a parallel subinterface crack in dissimilar anisotropic composite materials	TIAN WEN-YE and CHEN YI-HENG	305–322
Application of a modified rigid plastic model to the out-plane fracture of 'easy open end cans'	A. MONSALVE and I. GUTIÉRREZ	323–339
Role of plastic zone in crack growth direction criterion under mixed mode loading	K. GOLOS and B. WASILUK	341–353
Crack deflection at an interface between dissimilar piezoelectric materials	QING-HUA QIN and XI ZHANG	355–370
Interaction among a row of ellipsoidal inclusions	NAO-AKI NODA, HITOSHI HAYASHIDA and KENJI TOMARI	371–392
A comparative study of dynamic, ductile fracture initiation in two specimen configurations	SUMIT BASU and R. NARASIMHAN	393–410
Volume contents		411-413
Author index		413
